## Monday, April 16, 2018, Interpret Balanced Chemical Equations

- Use a balanced chemical equation from each one of the 5 reaction types to complete the following.
- 1. Write the balanced chemical equation

Determine the ratios between the following

- A. Moles
- B. Grams
- C. Atoms/Molecules or formula units

Notes

Use the examples provided in the class as a guide to complete this assignment.

You ppt slides should looks like the following example provided below.

## Example: Interpreting a Balanced Decomposition Reaction
